

The New Requirement for Healthcare Facilities: Electronic Medical Records

The Indonesian Minister of Health has issued Minister of Health Regulation No. 24 of 2022 on Medical Records ("MOH 24/2022"), under which the MOH requires all healthcare facilities to keep electronic medical records. MOH 24/2022 allows, among other things, cooperation between a healthcare facility and a third-party electronic organizer and covers who may have access to electronic medical records.
